INTRODUCE

I am seeking an opportunity as a Backend Developer in a dynamic, fast-paced, and challenging environment. As a soon-to-be graduate with limited experience, I aim to build and enhance my skills in Backend development. My goal is to become a professional programmer with the ability to create innovative and efficient solutions for technical problems while contributing to the success of the organization.

I aspire to apply the latest knowledge and suitable programming languages such as ASP.NET Core and Java to build reliable and high-performance web applications. I am willing to participate in software development projects, explore new technologies, and continually improve my programming skills to achieve professional growth and success in my career.

SKILLS

- **Frontend:** HTML/CSS, JavaScript, ReactJS, Bootstrap.
- **Backend:** ASP.NET Core (MVC + API), Java, Entity Framework, Java Servlet, Spring Boot.
- **Database and Other Tools:** MS SQL Server, Firebase, Git.
- **Soft skills:** Communication, Creative thinking, Time management, Problem solving, Responsibility, Self-learning.
- **English:** Independent.

EDUCATION AND CERTIFICATIONS

FPT University, Ho Chi Minh City - Fourth-year student

Sep 2020 – Present

- Learn foundational knowledge of programming, algorithms, and databases.
- Acquire research and self-learning skills, teamwork, team leadership, and problem-solving skills.

EXPERIENCE

Amazing Tech, Ho Chi Minh City - Backend Intern

Dec 2022 - Jun 2023

- Participated in a real product development project.
- Developed self-learning and problem-solving skills.
- Enhanced programming skills with Asp.net core and MSSQL Server.
- Gained familiarity with a real working environment.

PROJECTS

1. *Platform connecting learners with Mentor - Project for Amazing Tech Company*

- Description: This is a project aiming to connect mentor and learners. Here, mentors will upload their courses, and learners can choose suitable mentors and courses to participate in.
- Technologies: ASP.NET Core 7 MVC + API, Identity, Entity Framework, MS SQL Server, HTML/CSS JavaScript.
- Role: Leader, Back-end, Google Sign-in Integration, Momo payment integration.
- Team size: 4 members.
- Responsibilities:
 - + Developed learner functionalities following the MVC pattern using ASP.NET Core 7.
 - + Authentication and user authorization.
 - + Collaborated with the frontend team and other teams to refine the user interface.
 - + Integrated third-party APIs for payment processing and transaction management.
- Link website: <https://bsmart.edu.vn/>
